

Commercial Conservation

save0Nenergy FOR BUSINESS

Businesses across Ontario can benefit from an array of programs offered throughout the province. There are energy-efficiency programs to assist organizations from the smallest of retail stores to the largest industrial complexes. There are programs to help fund energy audits to replace energy-wasting equipment or to pursue new construction exceeds our existing codes and standards.

Businesses can also pursue incentives for controlling and reducing their electricity demand at specific times. The bottom line is that there are innovative programs that can help businesses reduce their electricity costs, while helping Ontario defer the need to build new generation and reduce its environmental footprint. For further information, please contact ERTH Power at 1-877-850-3128 or by e-mail ConservationPrograms@erthpower.com

save0Nenergy SMALL BUSINESS LIGHTING

Now, more than ever, businesses in Ontario are looking for ways to save costs and be more energy-efficient. Under the [Small Business Lighting program](#), qualifying businesses can get up to \$1,500 worth in energy-efficient lighting and equipment upgrades along with access to further incentives.

To arrange an assessment, please call Burman Energy Consulting Group Ltd. at 1-877-662-5489 or [by e-mail](#).

save0Nenergy RETROFIT PROGRAM

Install Energy-Efficient Measures and Earn up to 50% of your Project Costs!

For many business owners, capital costs prove to be the barrier to investing and participating in a retrofit. These [Retrofit Program](#) incentives are designed to help you tackle this problem head on making it possible for you to install and benefit from new and more energy-efficient solutions.

Focus your Energy-Efficiency Decisions on your Building Retrofits!

Becoming more energy-efficient is paying off for commercial organizations looking to respond to growing market pressures and increased global competition. Operating as efficiently as possible will help improve your bottom line. Even small steps can make a measurable difference.

save0Nenergy AUDIT FUNDING

Incentives to Help you Spot Energy-Saving Opportunities

You're already doing a good job managing and maintaining your high performing building. Even though your building is running well, these [Audit Funding](#) incentives could help you achieve even greater efficiencies while reaching or even exceeding your business goals.

[save0Nenergy HIGH PERFORMANCE NEW CONSTRUCTION](#)

Ensure Energy-Efficiency is Built into your New Construction and Major Renovation Project from Day One

Targeting new construction and major renovations in the planning stages, this program provides design assistance and substantial financial incentives for building owners and architects who exceed the electricity efficiency standards

specified in the Ontario Building Code.

Today, developers, architects, engineers, property owners and others in the building industry recognize the significance and positive impact of high performance construction. It clearly pays to put energy efficiency high on your priority list when renovating or building new facilities.

The [High Performance New Construction program](#) rewards builders and their project decision-makers with incentives for offsetting the cost of energy-efficiency measures, achieving lower long-term operating costs, greatly improved marketability and enhanced occupant comfort. By designing and building new buildings with more energy-efficient equipment for lighting, space cooling and ventilation, your buildings will cost less to operate, have lower environmental impacts and be a comfortable place in which to live, work or play.

save0Nenergy PROCESS & SYSTEMS

Get up to 70% Funding Toward Major Energy-Saving Upgrade Projects

Everyday, more and more Ontario businesses are uncovering the bottom-line benefits of energy efficiency. This is especially true of large industrial and commercial facilities, where bigger energy costs can easily translate into bigger opportunities to save.

The [Process & Systems upgrade program](#) is designed to help you find and hold onto major energy savings. It includes the valuable financial incentives and technical expertise that you need to upgrade your key systems and make improved energy management a part of how you do business. This program gives you the opportunity to take control of your energy so you can create a long-term competitive advantage that reaches across your entire organization.

save0Nenergy NEW HOME CONSTRUCTION

The [New Home Construction](#) initiative is designed to encourage home builders and renovators to construct energy-efficient homes in Ontario by incorporating energy-efficiency into their construction or any extensive renovation.

Home builders and renovators can choose to implement Prescriptive, Performance-Based or Custom measures, or a combination of all three. Home owners who are managing their own renovation, and can provide proof of purchase for any equipment that is eligible for an incentive can also apply for the three different streams in the initiative.
