

Energy Manager

Energy Manager

You have the power to control and manage your power consumption in your workplace and business. EARTH Power, through Utilismart, can help you use your energy more efficiently and manage your costs more effectively.

If the answer to any of the following questions is “Yes” call EARTH Power today and ask for our Utilismart specialist.

1. Are you having trouble tracking your energy use and costs?
2. Do you want to learn more about Ontario’s deregulation process and how it affects the energy market and your business?
3. Do you want to have the manpower and the money to manage your energy costs?
4. Are you interested in having more control over how the open energy market affects your business?
5. Will having more influence over your energy needs and expenditures have a positive effect on your business operations?

For over three years Utilismart software has specialized in operating a web-based service providing local utilities and large power users with the service and information needed to make informed business decisions about electricity usage.
